Why do patients choose our Center?

The oldest head cardiological center in Russia

The National Medical Research Center of Cardiology named after ac. E. Chazov has been the head research and clinical center in the field of cardiology in Russia since 1945.

Worldwide recognition

In 1975, in our Center, for the first time in the world, intracoronary thrombolysis was performed for a patient with myocardial infarction. This discovery forever changed the principles of myocardial infarction treatment and saved millions of lives around the world.

Highly qualified medical care

Our Center provides a full range of highly qualified medical care for patients with cardiovascular and concomitant diseases in accordance with international clinical guidelines.

Leading Experts

Our doctors are opinion leaders in the field of cardiology and cardiovascular surgery not only in Russia, but also in the world.

World-class equipment

Our Center is equipped with world-class equipment that allows to undergo diagnostics of cardiovascular diseases quickly and comfortably, and develop an optimal concept for treatment and rehabilitation.

Great clinical experience

We accept patients from all over the world and each of our patients receives high-quality medical care that meets high international standards in comfortable conditions of stay.

Our advantages

- 1 Our specialists are actively engaged in scientific research, development of new methods for treating cardiovascular diseases and introduction into clinical practice, the best domestic and world technologies, medicines and medical devices
- 2 We perform innovative cardiac interventions and surgery, including transcatheter heart valves interventions, angioplasty of pulmonary arteries, various types of ablations for complex arrhythmias, hybrid minimally invasive interventions and "large" cardiac surgery
- 3 We guarantee high professionalism of medical personnel
- 4 We provide medical care to all patients according to a uniform price list, including foreign patients, and the cost of medical care is much lower than in Europe and Israel
- 5 We adhere to the principles of patient-oriented medical care, building partnership with the patient and taking into account his opinions and preferences
- 6 We speak different languages, including English, French, Armenian, Georgian, Arabic, etc.

How can a foreign patient seek medical help at our Center?

1

Send a request for a diagnostic or treatment program by email, telephone or via telemedicine consultation (indicating the patient's full name, date of birth and diagnosis, if available)

2

Provide results of previous investigations, consultations of doctors, hospital discharge letters and other medical documents

3

Wait for an answer to your request from our specialist

4

Agree with our specialist the date of your visit, the date of hospitalization and the cost of medical care

5

Get a visa to enter and stay in Russia on the basis of our official invitation

6

Deposit money for medical care on the visit or hospitalization day

Medical aid for foreign patients: how it works in our Center?

1

We evaluate the medical documents, provided by patient. After that we have a discussion with patient by phone (in English)

2

We prepare and offer a check-up program or treatment and rehabilitation program (with preliminary calculation of costs)

3

We provide the patient with an official invitation for medical treatment to facilitate obtaining a Russian visa

4

We supervise the patient from the moment of contracting until the end of treatment

5

We organize the logistics of patient in our Center (including visits to different departments for investigations)

6

We help patients to feel comfortable and to overcome the language barrier by means of engagement of native speakers (in case of possibility)
